**STEVEN SVEHLAK, MD, FACS**

This 28-year-old patient was thrilled to fill out her clothes better after having smooth, round moderate-plus profile 375-cc silicone implants inserted via an infra-areolar incision (blended around nipple). The Dual Plane technique, which positions the implant partially under the muscle, was used to reduce the risk of capsular contracture and achieve natural-looking cleavage.

**DANIEL YAMINI, MD, FACS**

This 32-year-old patient wanted to regain her natural and fuller breast shape after two pregnancies. Smooth, round 371-cc silicone implants were placed through an incision around the areola. The implants were positioned partially under the muscle with the Dual Plane technique for the most natural, comfortable results possible.

“our goal is to safely deliver natural-looking results that each patient can feel proud of”

**The secret to achieving natural-looking breasts**

Two of the most popular procedures at Sunset Cosmetic Surgery are breast implants and breast lifts with implants. This may be due to the ultranatural look these two double-board-certified surgeons are consistently able to achieve. “It starts with choosing the right implant size and shape, customized to each patient’s physique, lifestyle and taste,” says Dr. Svehlak. Then, the silicone or saline implants are placed with great care to produce a balanced and natural look. “We also give patients a choice in deciding where the incision will be located,” says Dr. Yamini, with many opting to have it blended along the border of each nipple (infra-areolar). This technique also allows nipples to be resized when needed, and a lift can also be done, when needed, to give one or both breasts a youthful and perky, yet natural-looking, result.

Injectable Fillers

**ABOUT DR. YAMINI AND DR. SVEHLAK****WHAT IS THE MOST REWARDING PART OF YOUR JOB?**

Dr. Yamini: “Delivering confidence. I love creating beauty, but the best part goes beyond the aesthetic results themselves. I love seeing the internal transformation my patients experience when they feel really good about how they look.”

**WHAT IS YOUR APPROACH TO PLASTIC SURGERY?**

Dr. Svehlak: “I am here to help my patients achieve a change in their life, safely and as comfortably as possible. I always strive to give them natural-looking results they can be proud of and feel confident about.”

**ARE MOST OF YOUR PATIENTS WOMEN?**

Dr. Svehlak: “Certainly a large portion of my patients are women, however, our practice reflects the growing trend in aesthetic services for men as well.” Adds Dr. Yamini: “The most requested procedures for men are correction of gynecomastia (male breasts), liposuction (love handles are the most requested) and chin implants, which can help someone with a weak chin achieve a more balanced face and masculine jaw line.”
