

Dr. Daniel Yamini and Dr. Steven Svehlak

Sunset Cosmetic Surgery
Los Angeles, California

DANIEL YAMINI, MD, FACS

This 44-year-old patient couldn't lose her "muffin top" at the gym, and wanted sexier-looking thighs and a smoother backside. Dr. Yamini performed liposuction on her abdomen, waistline and thighs to give her a more athletic shape while still keeping her curves. The after photo shown is four years post-op.

STEVEN SVEHLAK, MD, FACS

This Mommy Makeover started with Natrelle®, saline breast implants (style 68 HP, 400cc, both filled to 430ccs) placed under the muscle (dual plane) with an infra-areolar incision. To flatten and re-tighten her waistline, she also had a mini tummy tuck and liposuction of the flanks, back and abdomen.

“our goal is for each patient to look like themselves...only better”

ABOUT DR. YAMINI AND DR. SVEHLAK

HOW DO YOU DEFINE PLASTIC SURGERY?

Plastic surgery is a combination of skill, an artistic eye and talent. A superior plastic surgeon has all those attributes, in addition to experience.

WHAT ARE THE KEYS TO A SUCCESSFUL SURGERY?

The keys to success for the best possible surgical result begin with an in-depth consultation with a qualified, board-certified surgeon. In addition, following medical advice, both before and after surgery, is important for optimal healing.

HOW DOES YOUR STAFF ENHANCE THE EXPERIENCE AT SUNSET COSMETIC?

Our staff is a critical part of each patient's experience at Sunset. The team is professional, friendly and works to stay informed about the latest in plastic surgery procedures. We never take shortcuts. A patient's safety, health and satisfaction with his or her results are our top priorities.

New Year, New You

"Cosmetic surgery has become the New Year's resolution of choice for thousands of men and women," says Dr. Yamini, a double board-certified surgeon who specializes in cosmetic surgery and nonsurgical procedures. Thousands will resolve to lose weight, tone up and enhance their appearance. Many will elect for cosmetic surgery to help them reach their goal of looking and feeling better. Before considering a procedure of any kind, Dr. Svehlak emphasizes that it is vital to inquire about a doctor's credentials and experience. A surgeon board certified by the American Board of Plastic Surgery has graduated from an accredited medical school, completed at least five years of surgical training as well as a minimum of two years devoted entirely to the study of plastic surgery. Both surgeons point out that cosmetic plastic surgery is no longer just for the rich and famous. In fact, plastic surgery can be more affordable than most think, and the benefits and confidence can last a lifetime.
