

Dr. Daniel Yamini and Dr. Steven Svehlak

Sunset Cosmetic Surgery
Los Angeles, California

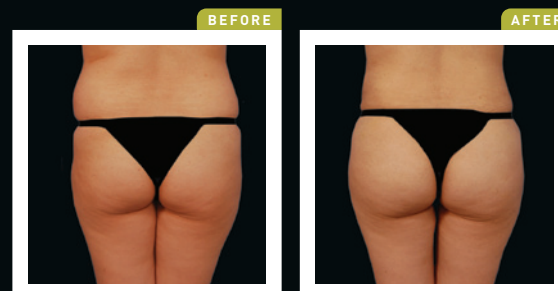

Beauty: Created & Maintained

Between their afternoon surgical consultation appointments, the surgeons at Sunset do hundreds of injectable treatments every month to help patients look fresher and younger in just minutes. From Botox® and Dysport®, to Juvéderm® and Radiesse®, a customized plan is created for each patient to gently turn back the hands of time, define lips or add volume to certain areas of the face. The "liquid facelift" has become a popular procedure, which uses a combination of Botox to relax certain wrinkle-causing facial muscles, and dermal fillers to plump cheeks or lips, and fill-in wrinkles or under-eye hollows. The result? A natural-looking, more youthful appearance in about 30 minutes. Due to the volume of injectable procedures they perform, Sunset Cosmetic Surgery has achieved Black Diamond level status (top 1% of injecting practices nationwide) with Allergan.

STEVEN SVEHLAK, MD, FACS

This patient felt that her breasts looked deflated. Natrelle® gel smooth, round implants (style 20, 375cc each) were placed under the muscle using the dual plane technique and an infra-areola incision for a natural look.

DANIEL YAMINI, MD, FACS

This 30-year-old patient couldn't lose her "muffin top" at the gym, and felt her buttocks were flat and not sexy. Dr. Yamini performed liposculpture on her abdomen, waist, flanks, and hips. He then transferred the fat to her buttocks (Brazilian Butt Lift) to give her a more feminine shape.

"we strive to make each patient feel safe, comfortable and proud of their results"

Injectable Fillers

ABOUT DR. YAMINI AND DR. SVEHLAK

WHAT DO YOU DO TO MAKE PATIENTS FEEL AT EASE?

"Our staff helps us stay organized," says Dr. Svehlak, "which means we can focus on our patients, and give them the time and attention they deserve." Dr. Yamini adds, "Patients don't want to feel rushed, and need to understand what the plan is, and exactly what to expect as they heal."

WHERE DO YOU PERFORM YOUR SURGERIES?

Dr. Svehlak: We are very selective about the anesthesiologists and surgical techs we work with. We won't perform surgery elsewhere,

and will even move a surgery date if one of our preferred surgical teams is not available.

IN WHAT WAYS DO YOU PUT PATIENTS FIRST?

Dr. Yamini: We book adequate time for each patient. Nobody likes to wait, and we consider a patient's time as valuable as ours. Some patients are surprised when we recommend a less-expensive alternative to a procedure they are considering. Our priority is to earn their trust.
