

Dr. Daniel Yamini and Dr. Steven Svehlak
 Sunset Cosmetic Surgery
 Los Angeles, California

DANIEL YAMINI, MD, FACS

This 53-year-old patient felt she looked older than her age. Dr. Yamini performed a facelift, brow lift, upper blepharoplasty (upper eyelids), facial fat grafting and Portrait® Plasma Skin Regeneration to help her achieve a natural, refreshed look.

STEVEN SVEHLAK, MD, FACS

This 44-year-old patient wanted to improve the full, heavy look in her neck, jawline and jowls. Dr. Svehlak treated these areas with VASER Liposuction to contour and enhance her jawline and neck for a taut and more youthful look.

“we strive to make each patient feel safe, comfortable and proud of their results”

Award-winning compassionate care at Sunset

The surgeons at Sunset credit their recognitions and achievements to a variety of factors: Their length of experience, an unrelenting commitment to patient safety and satisfaction, and an eye for the details that produce beautiful, natural-looking results. Listed among America's Top Surgeons in the annual Consumers' Research Council guide since 2003, and recipients of multiple Patients' Choice Awards from Vitals.com, Drs. Svehlak and Yamini were recently voted two of America's Most Compassionate Doctors on Vitals.com, an honor earned by only 3% of active physicians nationwide last year. "It's great to be honored for your achievements, but being recognized by our patients is especially meaningful," says Dr. Svehlak. "We are adamant about taking plenty of time with each of our patients," adds Dr. Yamini. "From our office team, to our highly-experienced surgical staff, everyone works incredibly hard to earn the trust and confidence of our patients."

ABOUT DR. YAMINI AND DR. SVEHLAK

DESCRIBE THE ATMOSPHERE AT YOUR OFFICE.

On the eighth floor of a high-rise on Sunset Boulevard, our office has spectacular views that stretch from downtown LA to the Pacific Ocean. It is clean and contemporary, yet comfortable. We wanted to create a relaxing environment.

WHAT NONSURGICAL PROCEDURES DO YOU OFFER?

BOTOX®, injectable fillers and VI Peels are quick and easy ways we turn back the hands of time in a matter of minutes. Portrait Plasma Skin Resurfacing and VI Peels are also popular choices for treating wrinkles, age spots, sun damage and uneven skin texture.

WHAT DOES A CONSULTATION ENTAIL AT SUNSET?

The staff at Sunset carefully books adequate time for each consultation so that no one feels rushed when they come in. Consultations begin with a discussion of the patient's goals and any potential concerns they might have. Then, some photos are taken, which are used to create a customized surgical plan. We go through the plan with the patient, and take plenty of time to answer questions and talk about ways to promote post-surgical healing. Our surgical consultants provide each patient with a summary of all of the costs, and we encourage patients to call us if they think of additional questions later.
