A BETTER BACKSIDE

One of the fastest-growing procedures at Sunset Cosmetic Surgery is the Brazilian butt lift. The procedure reshapes the buttocks using a combination of fat grafting and targeted liposculpting for a perkier, curvier backside. Popular with patients who feel their buttocks are flat or starting to sag, fat is extracted from two or three areas of the body, then purified and injected deep into the areas of the buttocks that need additional volume. "Squats and lunges can help, but are usually not enough for a patient considering this procedure," says Dr. Yamini. Liposuction of the lower back and hips can be performed to enhance the effect.

STEVEN SVEHLAK, MD, FACS

Unhappy with her body after having several children, this 30-year-old patient underwent a Brazilian butt lift, a tummy tuck revision and a breast repair using fat grafting.

"WE STRIVE TO HELP EACH PATIENT FEEL
SAFE, COMFORTABLE AND CONFIDENT."

WHAT SHOULD I EXPECT FROM A COSMETIC SURGERY CONSULTATION?

We consult with each patient about their aesthetic goals and counsel them regarding which procedures will help them achieve their desired look. Our no-pressure approach ensures our guests feel comfortable and at ease.

IN WHAT WAYS DO YOU PUT PATIENTS FIRST?

We book adequate time for each patient. We know that nobody likes to wait and that each patient's time is as valuable as ours. In addition, we never take shortcuts—safety and satisfaction are our top priorities. Patients are often surprised when we recommend a less-expensive treatment option. We hope it goes to show that we really want what is best for them.

HOW DO YOU DEFINE PLASTIC SURGERY?

Plastic surgery is a combination of skill, artistic eye and talent. A superior plastic surgeon has all those attributes, in addition to experience.
