MOMMY MAKEOVERS: BEAUTY BY DESIGN

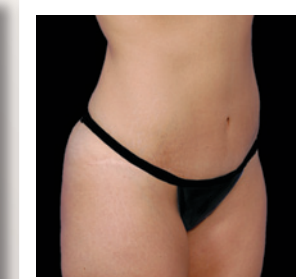

The surgeons at Sunset Cosmetic Surgery specialize in natural-looking enhancements of the breast and body, including Mommy Makeovers, a grouping of procedures that help restore a woman's body to its pre-pregnancy shape. Customized to fulfill a patient's aesthetic goals, these combinations typically include breast surgery, body contouring and abdominoplasty. The surgeons take a comprehensive approach and spend as much time as necessary during consultations to realize each patient's goals and concerns. They are focused on maximum patient safety while delivering a positive experience with the best possible results.

BEFORE

CASE 1

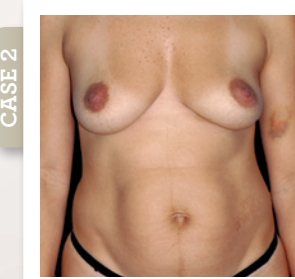

AFTER

▶ RESTORING MOM'S FIGURE

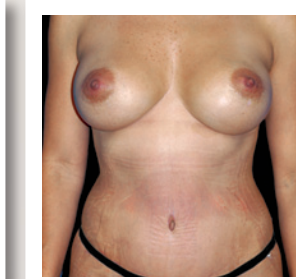

This 37-year-old patient was unable to lose the extra skin on her waist after pregnancy. Dr. Svehlak performed a tummy tuck and liposuction to restore her figure.

BEFORE

CASE 2

AFTER

▶ A MAKEOVER FOR MOM

Dr. Yamini performed a Mommy Makeover on this 36-year-old patient including a dual-plane breast augmentation, tummy tuck and body sculpting via liposuction.

WHEN IS IT TIME FOR A MOMMY MAKEOVER?

Patients should let their body get back to normal. They should lose as much of their weight gain as possible and maintain a healthy, stable weight, aiming for three months as a guideline. Breast-feeding should also be complete (for at least two to three months) so that the breasts can return to normal.

WHY HAVE A MOMMY MAKEOVER RATHER THAN INDIVIDUAL PROCEDURES?

The best reasons to combine procedures into a Mommy Makeover are to minimize recovery time and to enjoy significant cost savings. Patients will benefit from one single period of recovery as compared to several, and overhead operating room and anesthesia costs are only charged once.

WHO IS A CANDIDATE FOR A MOMMY MAKEOVER?

Schedule a consultation with a board-certified plastic surgeon to discuss aesthetic goals and desired procedures. While there are many physical benefits, an increase in self-confidence and self-esteem are often stated as the biggest. A personalized plan can be created based on age, expectations, future pregnancies and individual body specifics.
